

2015 Granada Summer School on

Quantum Matter Out of Equilibrium

14th-17th September 2015, Granada, Spain

This School will feature tutorial style lectures introducing themes in the areas of **dynamics of open quantum systems**, **glassy systems** and **relaxation of closed quantum systems** from a **theory and experimental** perspective.

The aim is to provide a basis for new members of the community, deepening the knowledge of more experienced ones and giving a flavour of current trends in the field. All lectures will be given by leading scientists from around the world, but participants are strongly encouraged to present and discuss their own research, especially during a dedicated poster session. The level of the lectures will be aimed at graduate students and young post-docs.

Registration open: **16th March - 29th May**
